

Certificate of Quality Assurance for Vaponics Cartridges

Product Identification

Model Number: **OX-1**

Materials of Construction

Cartridge Housing: ABS
Cartridge Endcaps: ABS
Skreens: Dacron
Media: Ion-exchange resins.

Physical Characteristics:

Nominal length: 17"
Nominal diameter: 3.5"
Media layers: Oxygen removal

Performance Capacity Characteristics:

Oxygen removal capacity: 15 grams

Quality Assurance:

All cartridges are assigned a lot code to ensure the traceability of the data and materials used in the manufacturing process. They each display a date after which capacity may drop below 80%, and an expiration date.
